

Puzzle Ring

EMPORIUM

4-Band Puzzle Ring Instructions except 4C3, 4CH, and 4CHWB

						
<p>1. Hold band stamped "1" (rounded outside band) with the irregular portion up and in your left hand.</p>	<p>2. Bring band stamped "2" (other outside band) up against "1" band forming diamond shape. Note- these are the outside bands when the ring is assembled.</p>	<p>3. Grasp band stamped "4" in your right hand with the stamp facing you and the flat part of the band up, allowing the "1" and "2" bands to fall to one side. If you're right-handed you may want to transfer the "4" band to your left hand.</p>	<p>4. With your free hand take the band stamped "3" (it should be hanging at the bottom) by the flat part of the band and bring it up towards the "4" band until the bands are almost against one another.</p>	<p>5. Holding the "3" band between your thumb and forefinger, twist band clockwise from the top.</p>	<p>6. Continue turning band until you have completed a 180-degree rotation.</p>	<p>7. The "3" and "4" bands should fit together, holding the two outside bands ("1" and "2")</p>
						
<p>8. When the previous step is completed, "3" and "4" create an X when viewed from the top.</p>	<p>9. Take the first loose band on the same side which is "2" and rotate the band until the irregular shaped part is on the inside of the ring.</p>	<p>10. When you have completed the rotation, be sure that the "V" shaped part on the inside of the ring is over the remaining loose band.</p>	<p>11. Bring band up and fit against "3" and "4".</p>	<p>12. Flip ring over and rotate "1" until the irregular part of the band is on the inside.</p>	<p>13. When you have completed the rotation, bring "1" band up against the other three bands.</p>	<p>14. Congratulations, you have assembled your ring.</p>
